SUMMARY

Programmer Analyst at Cognizant working as an Automation Tester. I also specialize in modern web and mobile applications, Testing, and AI integrations. Proficient in Backend Development, Automation Testing, and full-stack development, with hands-on experience orchestrating real-time data flows, automation testing pipelines and AI integrations.

EDUCATION

AISSMS College of Engineering

B.E. in Computer Engineering **2021 - 2025**

- Specializing in Backend Development, Data Science, Machine Learning and Mobile App Development.
- Co-Head of Programming for the CIPHERS club, orchestrating coding events to elevate campus tech culture.
- Built full-stack applications with Flask, PHP, and MySQL, React Native, alongside Python automation tools using Selenium.

EXPERIENCE

Cognizant PA

Programmer Analyst **Aug 2025 - Present**

- Automating comprehensive test cases across various projects using Python, Selenium, and Robot Framework by thoroughly analyzing requirements and designing robust test steps.
- Executing test scripts both locally and via Jenkins to ensure cross-system compatibility, seamlessly pushing results and metrics to Jira and qTest.
- Gaining deep insights into enterprise project lifecycle management, actively participating in client meetings, daily status calls, and progress reporting.
- Ensuring project deliverables consistently meet client expectations and strict deadlines through effective team collaboration and agile workflows.

Cognizant Intern

Intern **Mar 2025 - Aug 2025**

- Learned about Automation Testing Lifecycle by utilizing Java, Selenium, log4j, Cucumber BDD, and Gherkin for robust test design and execution.
- Led a QA team to automate testing for a District Website, successfully verifying complex features like event booking and dynamic seat selection.

- Gained hands-on experience in agile workflows, focusing on code integration, version control collaboration, and efficient work distribution.
- Developed strong professional soft skills, including leadership, conflict management, public speaking, and team collaboration.

SKILLS

- **Languages:** TypeScript, Python, Go, Java
- **Frontend Frameworks:** Next.js, React Native, Vue 3, Tailwind CSS
- **Backend & Databases:** Node.js, FastAPI, PostgreSQL, MongoDB, Neo4J, SQLite
- **DevOps, Testing & Tools:** Docker, Firebase, Ollama, Jenkins, Jira, Selenium, Robot Framework, QTest

PROJECTS

Persona.ai

Next.js, Electron, Neo4j, Ollama, Tailwind

- Built an offline, AI-powered desktop application that constructs and visualizes personalized psychological knowledge graphs.
- Packaged Next.js within Electron and integrated local Ollama instances to run open-source models privately.

Auction Manager

Vue 3, TypeScript, Node.js, PostgreSQL, Prisma

- Developed a full-stack real-time auction tracking platform handling concurrent bid updates without race conditions.
- Engineered a robust Node.js backend using PostgreSQL with strict transaction isolation levels, delivering data to a reactive Vue 3 client.

Vitality

React Native, Go, MongoDB, Firebase, LLaMA

- Built an AI-powered health and nutrition tracker allowing users to log food calorie intakes by scanning a food label using multimodal AI parsing.
- Developed a highly concurrent Go backend to handle API requests efficiently.
